4	1	0

Max Marks = 100

External Marks 80 and Internal Marks 20

Instructions for Paper Setter/Examiner: The examiner shall set nine questions in all covering the whole syllabus. Question No.1 will be compulsory covering all the units and shall carry 8 small questions of two marks each. The rest of the eight questions will be set from all the four units. The examiner will set two questions from each unit out of which the candidate shall attempt four questions selecting one question from each unit. All questions shall carry 16 marks each. The question paper is required to be set in English and Hindi version. Calculator and statistical tables is allowed.

Course Objectives: The objective of this course is to make the students learn about the application of statistical tools and techniques for managerial decision- making.

Important: The Examiner will set at least THREE numerical and THREE theoretical questions in the question paper restricting one numerical from one unit.

Course Inputs:

Unit - I. Quantitative Techniques: An introduction to quantitative techniques, classification of quantitative techniques, role / uses of quantitative techniques in business and industry, their functions, their scope and limitations of quantitative techniques.

Hypotheses Testing: Types of hypotheses, level of significance, type I and type II errors, one- tailed and two tailed test, power of test, critical value.

Unit - II Large Sample tests: Test of significance for attributes (proportion) for difference in mean of two independent means and correlation,

Small Sample tests: Assumptions and applications- t test, z-test, F-test.

Unit - III ANOVA: One way and two Way; Non-Parametric Tests: Sign-Test, Sign test for paired observations, Wilcoxon signed – rank tests, Wald – Wolfowitz –Witz test, Kruskal Wallis – Test and The Mann Whitney U-Test.

Unit - IV Chi-Square Test: Assumptions, Application, Goodness of Fit, Independent of attributes as parametric test, test of homogeneity, Additive Property.

Association of Attributes: Criterion of Independence, Consistency of data (two and three attributes).

Course Outcomes: Students will acquire skills to:

- resolve real time problems using quantitative techniques,
- take objective decisions and forecast.
- perform as a data analyst, statistician, consultant, business and risk analyst
- train others to carry out quantitative analysis of data.

Suggested Readings: (latest editions shall be followed):-

The examiner will set two questions from each unit out of which the candidate shall attempt four questions selecting one question from each unit. All questions shall carry 16 marks each. The question paper is required to be set in English and Hindi version.

Course Objectives:

The main purpose of this paper is to understand the process of research, concepts of sampling and tools for data collection and analysis and process of documentation and research report writing.

Course Inputs

Unit - I Introduction- Scope and Application of Research, concepts and tools for business research, Research process, Research Design: exploratory research, descriptive research, diagnostic research, action research and experimental research. Case study.

Unit - II Collection of data: primary and secondary data; sources of secondary data; methods of collecting primary data – observation, experimentation, simulation, interviewing, mail survey, projective techniques, Socio-metric, focus group discussion and content analysis. Tools for data collection–schedule and questionnaire; measurement scales; pilot study and pre-testing questionnaire.

Unit - III Sampling Fundamentals: Sample size determination, Sampling frame, Sampling design, Sampling techniques, Sampling and Non sampling errors, Law of large number and Centre limit theorem, Qualities of a good sampling design.
Field Work: Nature of field work; field administration; Editing, classification and codification of data.

Unit - IV Report writing: Types of reports; Planning report writing; research report format; documentation – footnotes and bibliography; writing the report and typing the report.

Course Outcomes: Students will be able to analyse, evaluate, and formulate a complete and logical plan for research.

Course Inputs:

Unit - I Probability and Probability Distributions: Probability Theory; Concept of probability; Different approaches to probability; conditional probability; application of Addition and Multiplication Laws; Baye's Theorem and Inverse probability and Mathematical expectation.

Probability Distribution: Concept, types. Discrete Probability Distributions: Binomial Distribution, Poisson Distribution- their assumptions, characteristics and application in decision making.

Unit - II Continuous Probability Distribution: Normal Distribution, characteristics, assumptions and their applications to business.

Linear Programming and Network Analysis. Linear Programming: Uses, applications, data requirement and limitations. Simplex Method only.

Unit - III Correlation and Regression: Meaning, significance, types of Correlation, Partial correlation, Multiple correlation

Multiple Regression: Meaning, Importance and Application (Up to Three Variables)

Unit - IV Time series: Components, models, trend analysis including second degree parabola and exponential formula measurement and of seasonal cyclical and irregular variations, shifting the trend origin.

Course Outcomes: Students will acquire skills to:

- resolve real time problems using probabilistic techniques,
- take objective decisions,
- forecast on the basis of correlation and regression analysis.
- perform research
- perform the job of data analyst, consultant, business risk analyst, statistics trainer.

Suggested Readings: (latest editions shall be followed):-

1. Levin, Richard and David S Rubin: Statistics for Management, Prentice Hall of India, Delhi.

**M.Com. - II Semester
Auditing**

Total Credits: 5

**L T P
4 1 0**

Max Marks = 100

External Marks 80 and Internal Marks 20

Instructions for Paper Setter/Examiner: The examiner shall set nine questions in all covering the whole syllabus. Question No.1 will be compulsory covering all the units and shall carry 8 small questions of two marks each. The rest of the eight questions will be set from all the four units. The examiner will set two questions from each unit out of which the candidate shall attempt four questions selecting one question from each unit. All questions shall carry 16 marks each. The question paper is required to be set in English and Hindi version.

Course Objectives: The purpose of this course is to develop an understanding of the underlying concepts, strategies and issues involved in the Auditing.

Course Inputs:

Unit – I Auditing: Meaning, objectives, importance and types of Auditing. Audit Process: internal control, internal check & internal audit, audit programmer.

Unit – II Audit Procedure: Routine checking and test checking, vouching, verification & valuation of assets & liabilities.

Unit – III Company Auditor: Qualifications and disqualifications, Appointment, Rotation, Removal, Remuneration, Rights and Duties; Liabilities of Statutory Auditors under the Companies Act, 2013.

Audit Report: Meaning, objectives, contents and types.

Unit – IV Investigation: Meaning, Nature and objectives.

Special Areas of Audit: Cost audit, Tax audit and Management audit; Recent Trends in Auditing; Basic considerations of audit in EDP Environment; Relevant Auditing and Assurance Standards (AASs).

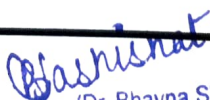

Course Outcomes:

- To provide knowledge and develop understanding of methods of audit in specialised areas.
- Understand the concept of corporate governance in organisations and its essence for management.
- Provide and assimilate information leading to failure of organisation and corporate scams.

Data Analysis with Statistical Softwares

Total Credits: 5

L T P
4 0 2

Max Marks = 100

External (P) Marks 80 and Internal Marks 20

Instructions: Practical shall be conducted by one external examiner and one internal faculty member.

Course Objectives: The objectives of this course include developing an appreciation of different tools available for data analysis by giving preference to the Free statistical softwares and build up the experience of analytical techniques with the help of computer.

Course Inputs:

Unit – I Introduction to the Free Software for data analysis like R, SAS, MYSTAT JAMOVI etc.
Data: Measurement and Scaling, Data Entry.

Data Cleaning (Improper code, Illogical errors, Missing Values and Outliers

Descriptive statistics and steps involved in calculation of descriptive statistics: Mean, Median, mode, range, Standard deviation, Skewness, kurtosis with any of the free statistical software.

Unit – II Testing of Hypothesis: Hypothesis Meaning; Procedure for hypothesis testing for mean, proportion and variance for large sample, t-test, z-test and F-test, Analysis of Variance: – one way classification and two way classifications with any of the free statistical software.

Unit – III Chi-square test: Assumptions and Applications with any of the free statistical software.

Non-Parametric test: Wilcoxon signed rank tests, Wald – Wolfowitz test, Kruskal Wallis Test and The Mann Whitney U Test with any of the free statistical software.

Unit –IV Correlation and Regression analysis: Coefficient of Correlation, Regression equation, Interpretation of correlation and regression results with suitable statistical Software.

Course Outcomes: Students will be able to use robust statistical techniques through free softwares.

Suggested Readings: (latest editions shall be followed):-

1. Andy Field, Jeremy Miles and Zoë Field, Discovering Statistics Using R, SAGE Publications Limited
2. Navarro DJ and Foxcroft DR (2022). learning statistics with Jamovi: a tutorial for psychology students and other beginners. (Version 0.75). DOI: 10.24384/hgc3-7p15.
