Statement: The in-charge, Department of Geography presented the syllabus of SEC-01 "Basics of IT Tools" for single Major B.A Geography (Honours) programme offered by GCW, Sonepat. The same has been approved by the UGBOS, Geography.

Decision: Discussed & Approved

Agenda 2: To discuss and approve the modification in the title of the PhD topic of Mrs. Priyanka, Department of Economics

Statement: The Chairperson, Department of Economics apprised the house that the PhD topic of Mrs. Priyanka approved by the PGBOS included acronym 'STEM' (Science, Technology, Engineering and Mathematics). But during the academic council meeting, one of the outside experts recommended that 'STEM' be modified as #'STEMM' (Science, Technology, Engineering, Mathematics and Medicine) and the same was approved by the academic council leading to issuance of registration letter to the candidate with acronym 'STEMM' in her topic. However the Research Supervisor Prof. Surender Mor disagreed with the modified acronym and has requested that the original topic with the acronym 'STEM' be retained, considering the scope of the study.

Decision: The matter was discussed at length by the FSS and recommended to retain the title as originally approved by the PGBOS with acronym "STEM" in the topic. However the Research Supervisor and Researcher have been advised through the Chairperson for exploring the possibility of collecting and collating data on urban females employed in medicine field to facilitate comprehensive and better understanding of the research area. The observations of the academic council be once again brought to the notice of PGBOS and its concurrence be obtained.

Agenda 3: To discuss and approve the PhD topic of Ms. Manisha, research scholar in the Department of Economics

Statement: The Chairperson, Department of Economics presented the case for registration of PhD topic entitled "Intention to Use Solar Rooftops for Cooking: a study of Rural Households in Haryana" submitted by Ms. Manisha research scholar, Department of Economics. The same has been approved by the DRC & PGBOS, Economics.

Decision: Though the topic was Discussed & Approved by the FSS, however it was suggested that the word 'intention' being subjective in nature be revisited and critically evaluated during the data collection and analysis stage. Also, it was suggested that since the target group 'rural households in Haryana' appears to be too vast and open ended, the same could be limited to a controllable target group facilitating more and real time data on the subject.

Agenda 4: To discuss and approve the PhD topics for the following research scholars of the Department of Social Work

Sr. No	Research Scholar	Research Supervisor	Roll No	Topic Approved by the PGBOS
1.	Ms. Arti	Dr. Gian Chand	22041001	Utilization of Social Security Schemes by Women Workers in the Agriculture Sector in Haryana
2.	Ms. Deepa	Dr. Gian Chand	22041002	Entrepreneurship in Dairy Farming by the Women of Marginalized Sections in Haryana
3.	Ms. Kritika Singh Bawaniwal	Dr. Deepali Mathur	22041003	Exploring the Spiritual Dimensions in Social Work Education and Practice in India

Statement: The Chairperson, Department of Social Work presented the aforesaid PhD topics approved by the DSC, DRC, and PGBOS.

Decision: Discussed & Approved

Agenda 5: To discuss and approve the Minutes of the PGBOS, Department of History & Archaeology

Statement: The in-charge, Department of History & Archaeology presented the Minutes of PGBOS.

Decision: Discussed in the meeting and the FSS recommended that since there is no regular faculty member in the department of History and Archaeology, in order to introduce PhD in the Department of History and Archaeology, PhD Ordinance of the University be modified by incorporating that "all eligible research supervisors working in UTDs and other institutions of the University besides IHL shall be eligible to supervise PhD research scholars in the concerned subject".

Agenda 6: Miscellaneous

Decision: The Dean, FSS enquired about the ongoing teaching and research activities in the departments of FSS. The HODs reported that academic activities of the departments are being conducted smoothly and as such there are no problems pertaining to faculty and resources. The dean asked the HODs to maintain qualitative and rigorous standards of academics. The departments have been requested to maintain update syllabuses and ordinances of academic programmes offered by the respective departments and to post the same on University website. Also the departments are to launch newsletters and journals for the concerned subjects.

on leave
Dr. Vivek Agarwal Dr. Veena H. Sharma 13/8/24. Dr. Madhavi Seetha Govind Dr. Govind Gupta

I Strongly Disagree with point no. (1), (a), (b) related to DPTTC as the course fee of DPT Course in 2010 was 12500/- for 6 months, after 14 yrs. later it cannot be possible to propose the fee 75000/- per 6 months.

The upper Age limit was proposed as per qualification of the courses.

Since 50% passing Marks are [illegible] therefore 60% Marks are being proposed for the courses which are Average now a days.

Further it is also suggested that Course Coordinator Dr. Amit Kumar was Course Coordinator of DPT. 14/08/24

Please depute him as a Course Co-ordinator of this Course.

For effective implementation of the dynamic curriculum, the timetable also needed to be dynamic in nature. Hence, there is [illegible] from static timetable to dynamic timetable. The following are the guidelines for framing a dynamic timetable. Institutes are requested to frame an *'institutional timetable'* by following instructions and guidelines:

Academic activities: Working hours per day shall be seven hours for academic activities for [illegible] students. it includes:

- Departmental Activities (DA) such as OPD postings/IPD postings clinical services/activities, herbal garden/departmental seminars/journal clubs guest lectures etc. as per the requirement of the concerned department

The [illegible] of work or number of activities specified for experiential learning in the curriculum is [illegible] the performance is flexible, i.e., as and when the student gets an opportunity the [illegible] to perform. For example, if a PG student has been assigned to appreciate and record the five types of naadi, the student has to appreciate and record all five types compulsorily [illegible] not be at a time; rather it may be done as and when suitable cases are available. However, this exercise is to be completed within the particular semester as per the curriculum.

Other activities: Night duties Emergency Call duties/Field Visits Medical Camps etc. not [illegible] in the curriculum shall be over and above the specified working hours. Clinical [illegible] other departmental activities assigned by the department shall be performed in [illegible] hours also.

PREFACE

Statistics plays a pivotal role in postgraduate studies, especially within Ayurveda, where it is essential for conducting research, validating traditional knowledge, and advancing clinical applications. In Ayurveda, the integration of statistical analysis allows scholars to analyze clinical data, ensure the standardization of formulations, and evaluate the efficacy of treatments. Additionally, the interpretation of literary research data from classical texts like Samhitas and manuscripts is critical for bridging ancient wisdom with modern scientific approaches.

This course introduces a comprehensive approach to biostatistics, emphasizing both theoretical understanding and practical application. Students will explore the use of statistics in clinical trials, formulation standardization, and data analysis from textual sources. Practical learning sessions focus on real-world applications, while experiential components guide students through analyzing classical Ayurvedic texts to derive meaningful insights using statistical methods.

Through this curriculum, students will gain valuable skills in statistical analysis and research methodology, empowering them to conduct robust, evidence-based research in Ayurveda. The course is designed to enhance critical thinking, enabling scholars to contribute effectively to the field with a deepened understanding of both traditional knowledge and contemporary scientific practices.

Modular Assessment	
Assessment method	**Hour**
Instructions - Conduct a structured Modular assessment. Assessment will be for 25 marks per credit. Keep structured marking pattern. Use different assessment methods in each module for the semester. Keep record of the structured pattern used for assessment. Calculate the Modular grade point as per table 6 C. Open-response questions: (25 marks) 1. Frame 5 open response questions to assess the student's real-world understanding of disease frequency and vital statistics. 2. Prepare rubrics and grade accordingly.	2

1341

Example- Open response question- You are tasked with evaluating the effectiveness of a new vaccination program for reducing the incidence of a specific disease in a region from. Describe how you would use incidence rates and prevalence rates to assess the impact of the vaccination program.
Expected Response: Incidence Rates: Measure the number of new cases of the disease during a specific period after the vaccination program is implemented. A decrease in the incidence rate would suggest the program is effective in preventing new cases.
Prevalence Rates: Assess the overall number of cases, including existing and new cases, before and after the vaccination program. A reduction in prevalence may also indicate that the vaccination program is reducing the number of people currently affected by the disease.

Assessment rubrics - *Excellent (5 Marks): understanding of the topic with minimal errors.*Very Good (4 Marks): Has good grasp but has some minor mistakes.*good(3Marks)
*Fair (2 points): Understanding is limited, with several errors.
*Poor (1 point): major misunderstandings or wrong answers.

Any practical in converted form can be taken for assessment.
Or
Any of the experiential as portfolio/ refelections / presentations can be taken as assessment.

Experiential-Learning 6.6	linear regression analyses	**Data Analysis:** - Using software like Excel, Google Sheets or other relevant Statistical software, the student shall perform Binomial Logistic regression analysis and visualize the data using appropriate graphs (e.g., scatterplots) to understand the relationships between variables. **Interpretation**: Student shall interpret the results of their regression analysis, paying attention to the coefficients, significance levels, and goodness-of-fit measures
Experiential-Learning 6.7	Survival Analysis - Kaplan-Meier method	**Introduction:** Introducing survival analysis and its significance in analyzing time-to-event data, such as when a patient experiences a particular event (e.g., disease recurrence, death). Kaplan-Meier method is a non-parametric approach used to estimate the survival function from censored data. **Data Selection:** Students shall choose their own set of data from healthcare, epidemiology, and social sciences **Data Exploration:** Students shall explore their chosen data sets, identify the survival times and censoring indicators, and clean and prepare data, ensuring the data is formatted correctly for survival analysis. Students shall calculate summary statistics, such as the median survival time, and visualize the data using appropriate graphs (e.g., Kaplan-Meier survival curves).

1349

		Kaplan-Meier Survival Analysis: Students shall perform Kaplan-Meier survival analysis using statistical software or tools like R, Python, or specialized survival analysis packages, estimate the survival function, plot the Kaplan-Meier survival curve, and interpret the results.

PREFACE

The field of Ayurveda, with its rich history and profound insights into health and well-being, demands a rigorous and evidence-based approach to research. To advance the understanding and application of Ayurvedic principles, it is essential that postgraduate students are equipped with a solid foundation in research methodology.

This syllabus has been carefully crafted to provide students with a comprehensive insight into literature search, framing research questions, stating hypotheses, research design, data analysis, ethical considerations, and scientific writing. By mastering these essential skills, students will be well-prepared to conduct independent research, contribute to the scholarly literature, and advance the field of Ayurveda.

The syllabus covers a wide range of topics, from the fundamentals of research to advanced techniques such as systematic reviews and meta-analyses. In an effort directed to learner-centric education, it also incorporates practical and experiential elements, including case-based learning and hands-on exercises, to ensure that students can apply their knowledge to real-world research challenges. At the same time, the syllabus provides an adequate opportunity for a teacher to kindle research acumen amongst students.

It is believed that this syllabus will serve as a valuable resource for postgraduate students in Ayurveda. By diligently studying and applying the principles outlined herein, students can develop the skills and knowledge necessary to conduct rigorous and meaningful research that will contribute to the advancement of Ayurveda.

6 B : Scheme of Assessment

Credit frame work

AYPG-RM has 6 modules of 9 credits which includes 270 Notional Learning Hours. One Credit will be having 30 Hours of learner participation and teaching, practical and experiential learning will in the ratio of 1:2:3 i.e. One credit will have 5 hours of teaching, 10 hours of practical training and 13 hours of experiential learning and 2 hours of modular assessment for 25 marks.

Module wise Assessment: will be done at the end of each module. Evaluation includes learners active participation to get Credits and Marks. Each Module may contain one or more credits.
Summative Assessment: Summative Assessment (University examination) will be carried out at the end of Semester I.

6 C : Calculation Method for Modular Grade Points (MGP)

Module Number & Name (a)	Credits (b)	Actual No. of Notional Learning Hours (c)	Attended Number of notional Learning hours (d)	Maximum Marks of assessment of modules (e)	Obtained Marks per module (f)	MGP =d*f/c*e*100

6 D : Semester Evaluation Methods for Semester Grade point Average (SGPA)

SGPA will be calculated at the end of the semester as an average of all Module MGPs. Average of MGPS of the Semester For becoming eligible for Summative assessment of the semester, student should get minimum of 60% of SGPA

SGPA = Average of MGP of all modules of all papers = add all MGPs in the semester/ no. of modules in the semester Evaluation Methods for Modular Assessment

1. Introduction and approval to start a New 02 years Diploma Course in Panchkarma Department.
2. Regarding to discuss and approve to consider as 'duty leave' instead of 'on duty' for the Visitation and Hearing Work of NCISM.

The following members were present in the meeting –

1.	Dr. Satya Prakash Gauttam	Chairperson & HOD Kayachikitsa
2.	Dr. Vishnu Gautam	Member & HOD Ras Shastra
3.	Dr. Bhoopal Chander Arya	Member & HOD Shalya Tantra
4.	Dr. Mukesh Dubey	Member & HOD Agad / In-charge D.G.

The agendas were discussed in details and the following decisions were taken unanimously-

1. The agenda to start a new 02 years Diploma Course in Panchkarma Department namely "***Diploma in Panchkarma Technician cum Therapist course (DPTTC)***" is approved in the meeting with the following amendments in the proposal submitted by the Head of Department Dr. Madhavi Seetha.
   a. The fee for the DPTTC Course will be remain as 7500/- (Seven Thousand Five Hundred only) per semester (i.e. 30,000/- [Thirty Thousand only] for complete course).
   b. The Eligibility point 3 of the proposal of ordinance will be rectified as upper age limit of 35 will be considered instead of 30 as recommended by HOD Panchkarma.
   c. The Eligibility point 3(a) of the proposal of Ordinance will be rectified as at least 40% aggregate marks (at par the SKAU, Kurukshetra) will be considered instead of at least

1477

60% in Senior Secondary Certificate Examination (10+2), Board of School Education, Haryana.

2. The "On duty days" for the NCISM Visitation and Hearing work will be deducted from the "Duty leaves" total 30 already allowed by the university authority in an academic year.

The meeting was ended with the vote of Thanks to the chair.

Dr. Satya Prakash Gautam | Dr. Vishnu Gautam | Dr. Bhoopal Chandra Arya | Dr. Mukesh Dubey

13/8/24

Dr. Vivek Agarwal (on leave) | Dr. Veena H. Sharma | Dr. Madhavi Seetha | Dr. Govind Gupta

I Strongly Disagree with point no. 1, (a) (b) & (c) related to DPTTC as the Course fee of DPT Course in 2010 was 12500/- for 6 months, After 14 yrs. later it cannot be possible to propose the fee 7500/- for 6 months.

The upper Age limit [illegible] per qualification of the courses since 50% passing marks are proposed, Therefore 50% Marks are being proposed for the courses which are Average now a days.

Further it is also suggested to Convener Dr. Amit Kumar being Course Coordinator of DPT.

13/08/2024

Please Depute him as a Course Co-ordinator of this Courses.

Agenda 2: To discuss and approve the modification in the title of the PhD topic of Mrs. Priyanka, Department of Economics

Statement: The Chairperson, Department of Economics apprised the house that the PhD topic of Mrs. Priyanka approved by the PGBOS included acronym 'STEM' (Science, Technology, Engineering and Mathematics). But during the academic council meeting, one of the outside experts recommended that 'STEM' be modified as #'STEMM' (Science, Technology, Engineering, Mathematics and Medicine) and the same was approved by the academic council leading to issuance of registration letter to the candidate with acronym 'STEMM' in her topic. However the Research Supervisor Prof. Surender Mor disagreed with the modified acronym and has requested that the original topic with the acronym 'STEM' be retained, considering the scope of the study.

Decision: The matter was discussed at length by the FSS and recommended to retain the title as originally approved by the PGBOS with acronym "STEM" in the topic. However the Research Supervisor and Researcher have been advised through the Chairperson for exploring the possibility of collecting and collating data on urban females employed in medicine field to facilitate comprehensive and better understanding of the research area. The observations of the academic council be once again brought to the notice of PGBOS and its concurrence be obtained.

Agenda 3: To discuss and approve the PhD topic of Ms. Manisha, research scholar in the Department of Economics

Statement: The Chairperson, Department of Economics presented the case for registration of PhD topic entitled "Intention to Use Solar Rooftops for Cooking: a study of Rural Households in Haryana" submitted by Ms. Manisha research scholar, Department of Economics. The same has been approved by the DRC & PGBOS, Economics.

Decision: Though the topic was Discussed & Approved by the FSS, however it was suggested that the word 'intention' being subjective in nature be revisited and critically evaluated during the data collection and analysis stage. Also, it was suggested that since the target group 'rural households in Haryana' appears to be too vast and open ended, the same could be limited to a controllable target group facilitating more and real time data on the subject.

Agenda 4: To discuss and approve the PhD topics for the following research scholars of the Department of Social Work
