

Report

" A very informative workshop cum seminar was organised in the department of CSE and IT by the Training and Placement consultancy firm "Boston Institute of Analytics (BIA)". The workshop was based on the topic "Unlocking Careers in Data Science and Artificial Intelligence" conducted by team of expert professionals from BIA. The prefinal and final year students of BTech CSE and IT, besides the Research Scholars of the department actively participated in the three hour workshop extending from 10AM- 1.00 PM.

The students gained valuable insights with respect to the concepts pertaining to Data Science and Artificial Intelligence, their applications and tools in present day society, development of AI based applications, changing technological trends , with elaborate discussion of features of AI.

The students performed hands-on practice on their laptops by programming for different problems and their optimal solutions in Data Science and AI. The key areas of use of Data Science and AI in the present day with special focus on job opportunities in the market were also addressed. The students broadened their knowledge base with practical learning and enhanced their programming skills with respect to different applications in Data Analytics and Artificial Intelligence.

The workshop was well Coordinated by the Department TPO Dr. Vinod Kr. Saroha under the able guidance of Chairperson Ms. Sonal Beniwal ".
